| Distributions per share (cents)     | <b>446,4</b>      | 369,0         |

### Share price performance

The graph represents Bidvest's share price performance relative to indices which have been adjusted to give a more meaningful comparison to that of its peer group. A major constituent of the indices, Richemont Securities AG, has been excluded from the adjusted indices as its business is offshore and in completely different markets.

Market capitalisation as at June 30 2007 was R48,4 billion (R42,8 billion net of treasury shares)

R1 000 invested at the start of Bidvest, capital and dividend distributions re-invested, would have been worth an estimated R468 692, a return of 33,4% per year.
