

45. Changes in segmental information

During the year, certain operations were reclassified between segments, as a result of a change in how operations within the segments are managed. The comparative year's segmental information has been re-presented to reflect these changes.

The above reorganisation had no impact on the results of the Group as previously reported, and as such, a restated consolidated financial position for the year to June 30 2015 has not been included with this report.
